Dear Steve

We would like to take this opportunity to recognize the exceptional effort your company made to complete our PV solar installation efficiently and within our deadline in spite of the desperate timeline our position imposed on you.

We were forced to release the original company we had hired to manage the project for us after months of inactivity, missed deadlines and apparent inexperience. At that point we saw little hope of completing the work in the short time remaining to our OPA milestone deadline.

It was our good fortune that we contacted your company. At our first meeting you assessed our position and confidently assured us that you would be able to complete the project on time. We were skeptical. Substantial re-engineering had to be done, materials assembled and acquired, potentially poor weather overcome and the complete installation of the system achieved all within a window of two months.

You lived up to your promise with ease. The professionalism and excellent organization you have developed in your company became immediately obvious. Your colleagues were knowledgeable, efficient and affable. Your management of the process was a pleasure to observe and your engineering competence was always evident.

It was a pleasure working with your company and we will highly recommend Enviro-Energy, without reservation.

Sincerely

Louis Resendes
